

# Tampere New University – Guidelines for remodelling the university.

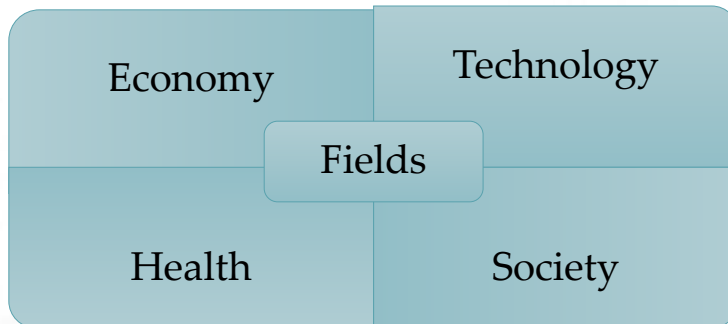

Faculty Manager Pirjo Kuhanen  
Tampere University of Technology

## Today's situation

- Tampere University of Technology, the University of Tampere and Tampere University of Applied Sciences have joined forces in order to develop a new kind of mode of operation in the Finnish higher education field:
  - Tampere University Foundation signed the Foundation's charter and approved its regulations on the 21<sup>st</sup> of April, 2017
  - The foundation university will also carry out university of applied science operations at Tampere University of Applied Sciences, which it is the majority owner of
  - On Thursday 8 June, the Government presented to the Parliament a bill proposing changes to the legislature on universities and universities of applied sciences as well as implementing the changes made to the Universities Act.
  - The new university is due to start operating at the beginning of 2019.

## Future

- The new university group will have 35 000 students and the amount of staff will be about 5 000
- Three campuses

## Today's challenges and success

- Different kind of cultures
- Different kind of management culture and structure
- Decision making is waiting for the new Board
- The both current universities have at this moment the dissident views how to form the Board and the Academic Board
- New university services such as IT, library, language centers has been proceeded
- Flexible study possibilities has been carried out
- Strategy work of new university will start within three months

## Foresight system

- The new university needs a foresight system
  - Lot of data is available in all three HEIs, but the analyzing is fragmented
- The new university can utilize the foresight in:
  - Strategy work
  - Profiling the future research and education
  - Finding and selecting the new openings
  - Quality management
  - Planning the annual operations and long-term operations
    - Financial issues, HR, education and research

## Foresight system

The system includes:

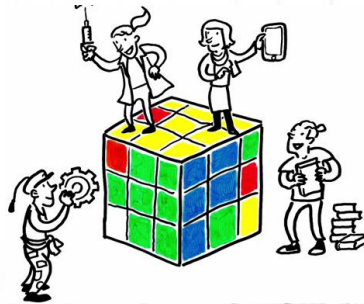

- History information and state-of-art
- Short-term operations
- The long-term prospect

The methods:

- SWOT
- Delphi
- Scenario work

## Open world-open mind

- The future university challenge
  - Finnish education system
  - The global instruction-the way of teaching
  - The role of Ministry of Education and Culture
  - The way of doing research
  - The funding schemes
  - Critical mass
  - Management

Thank you!
